

Power Dekor Engineered Hardwood Flooring Maintenance/Care Instruction

1. After the installation is completed, pay attention to maintaining air circulation, not close doors and windows. Furniture should be installed after 48 hours and then move in, the surface of the floor should not symmetrically placed overweight objects.
2. It is crucial to maintain humidity level at 35%-70%; high humidity will cause the floor arch, the sound, the humidity is too low will cause the floor serious cracking, delamination, warped, deformation.
3. When moving furniture and other heavy objects that touch the floor, use a clean cushion pad and pull it gently down.
4. It is recommended to place a good quality mat at the door to prevent sand from wearing the floor.
5. Furniture legs and other heavy objects touching the floor surface are advised to use special cushions pad.
6. The surface of the floor should not be covered with airtight material for a long time, and prevent the sun from exposure for a long time, avoid discoloration.
7. Prohibited use of alcohol(unless authorised by the Power Dekor), banana water, acid, alkaline solvent or organic solvent such as gasoline cleaning. It is recommended to use a vacuum to clean the dust first, apply dry mop with less water/pre-finished wood cleaner(Neutral PH)to clean the floor. Power Dekor can supply the mop kit by your order.
